

Powerway's pre-written Template Packs jump-start your implementation of international business standards, dramatically reducing the time it takes to create documents and audit quality systems.

- Pre-written, pre-configured generic documents mean you can edit the information provided, rather than start from scratch.
- Content-rich templates give you clear examples of what is required to create customized Level I, II and III documents.
- Template content goes beyond conformance to help drive “best practices” throughout your organization.
- Example audit checklist questions help you quickly and easily create your audit.
- Audit checklist guidelines provide valuable direction in interpreting the standard you are working toward.
- Template Packs are available for a variety of international business standards.

Follow Best Practices

Structure and content Template Packs provide generic documents for Powerway Policy Writer, Procedure Writer, Instruction Writer and Audit Manager. The audit checklist templates contain guidelines and hints to help you understand and interpret the requirements of the standard toward which you are working. Using these documents not only ensures that you save time, but that you also begin with content written to reflect your industry's best practices.

Also available are “structure only” templates that provide the structure and format of Level I, II and III documents without the content.

International Standards

Powerway Template Packs are available for the following international business standards:

- Structure and Content:
- ISO 9000: 1994
 - ISO 9001: 2000
 - ISO/TS 16949: 2002
 - ISO 14001: 1996
 - QS-9000: 3rd Edition
 - TE Supplement: 2nd Edition
 - EFSIS
- Structure Only:
- ISO/IEC 17025: 1999
 - BRC: April 2002

Powerway Suite 2000

Powerway's information technology drives innovation and quality throughout the product development process from concept and design through engineering, sourcing and manufacturing. Powerway's enterprise and supply chain solutions reduce risks and costs and accelerate product delivery by enabling connectivity, visibility and real-time information sharing.

Powerway software works together to provide complete paperless document and data control, advanced quality planning, integrated quality management and real-time factory floor data collection for optimum business process standardization and document management.

Suite 2000 helps your organization overcome the problems caused by a lack of communication and collaboration such as late engineering changes, product quality issues, scrap and rework, delayed product delivery and lost sales.
